

# Autonomous Finance

## The Complete Order to Cash, Treasury, and Record to Report Suite

To fully achieve financial transformation, the traditionally siloed processes and controls of the office of the CFO must seamlessly stitch all operations into a connected, collaborative ecosystem.

With the right solution, CFOs can prioritize the benefits of financial transformation and go beyond with a data-driven platform to deliver an intelligent, open, and unified platform that can be extended and optimized to stay in sync with the current systems and business changes of tomorrow.

Minimal IT dependencies with out-of-the-box Integration

Pre-packaged modules with Industry-specific best practices

Leader in the **Gartner** magic quadrant for invoice to cash

## Trusted by the fastest growing mid-sized businesses

## Full Suite Ahead

HighRadius provides the full suite of products to add incremental value to your finance department by improving processes with intelligent automation. Our product suite helps you to lower DSO and DDO, optimize working capital, fast-track financial close, and improve productivity and accuracy on a single cloud platform.

### Autonomous Receivables

**Collections:** Convert receivables to cash faster with a prioritized collections worklist, automated correspondence, in-app calling, and a single source of truth for all AR information, customer information, and collaboration history

**Credit Risk:** Onboard customers rapidly with an in-built credit database and automated credit scoring based on industry-specific best practices

**Cash Reconciliation:** Eliminate manual efforts and save time with automated remittance aggregation, invoice matching, and straight-through cash posting into your ERP

**e-Invoicing:** Get real-time credit risk alerts to rescore your customers and revise credit limits to mitigate risks and avoid bad-debt

### Autonomous Treasury

**Cash Forecasting:** An advanced system with self-service modules and proven Artificial Intelligence to provide accurate cash flow forecasts across all cash flow categories, accounts, currencies, and more

**Cash Management:** A solution that leverages automation to manage your company's daily cash operations and integrates with your bank accounts across the globe to give you a centralized view of your real-time, end-of-day, and end-of-week cash positions across multiple cash flow categories, companies, bank accounts, regions, and currencies

### Autonomous Accounting

**Financial Close :** Delivers end-to-end Financial Close Automation to enable day-zero close with close task and project templates, automated workflow and close task management, and accounting anomaly detection

**Account Reconciliation :** Optimizes Account Reconciliation by identifying and resolving variances for General Ledger Accounts through configurable matching rules and algorithms

**Anomaly Management :** Provides a summary view of anomaly types, period, risk categories, anomaly status, and action to be taken that helps address issues proactively rather than waiting until the month's end for adjustments
